VoIP
/revolutionize business communication

Don't let an old phone system get in the way of your business.

Grey Matter's VoIP Solution enables businesses to gain mobility, flexibility and a more effective way of communicating with employees and customers.

Grey Matter's VoIP (Voice Over Internet Protocol) platform offers a feature rich alternative to traditional and proprietary phone systems. Since calls are made over the internet, VoIP offers businesses a global reach without expensive long-distance call rates and bulky telecommunications equipment.

VoIP delivers benefits that go beyond traditional phone systems. As your business grows, you can easily add employees and new locations, and with added features like auto-attendant, find/follow and voice to email, communicating with your team has never been easier or more flexible.

VoiP Features

- Call Analytics
- Call Screening & recording
- Reach multiple devices simultaneously
- Voice mail to email
- Integration with Google Calendar, Outlook, SalesForce
- Easy install and modification

Call today to see how Grey Matter's VoIP solution will revolutionize your business communication game and reduce your phone costs by up to 75%.
